Abo Cyber-Erpressung in Aadorf

Hacker attackieren regionales KMU

Der Sonnenstoren-Hersteller Griesser ist Opfer einer Cyberattacke geworden. Es handelt sich um die Ransomware Conti, wie das Unternehmen aus Aadorf mitteilt.

Sicherheitsvorfall 14.04.2021, 17:44 Uhr

Schweizer Storenfirma Griesser von Hackern angegriffen

Die Schweizer Storenfirma Griesser wurde von Hackern ins Visier genommen. Ob auch Daten von Mitarbeitenden, Kunden und Partnern betroffen sind, ist derzeit noch unklar.

Schweizer Storenbauer Griesser von Ransomware Conti befallen

Von [Thomas Schwendener](#), 16. April 2021 um 14:33

Hacker-Gruppe steht vermutlich hinter Cyberattacke auf Griesser

Die Thurgauer Firma Griesser wurde Mitte April Opfer einer Cyberattacke. Mittlerweile ist der Betrieb wieder hochgefahren. Zudem gibt es einen Verdacht, welche Hacker-Gruppe hinter dem Angriff steckt.

How did the hack work technically?

Cyberattack Griesser

Lessons learned

- Technical:

- Operational:

- Process:

Technical:

- Activation MFA for all
- No internet access rights for admins
- O365 services were not affected
- Virus scanner had not responded!
- Offline backup incomplete

Operational:

- Prioritization of security topics (reactive operation)
- Introduction of CISO@a service
- Regular external pentesting
- Be challenged and reflect
- Extract positives from the experience
- Disaster recovery tests have been successful
- Backup concept / backup recovery tests

Process:

- Internal/external communication very important (transparency)
- Develop contingency plans/test regularly
- Cyber insurance was useful (experts immediately at the table)
- Introduction of a SOC (Security Operations Center)
